IN THE SPECIFICATION

Please replace the paragraph on page 9 at lines 22-30 with the following corrected replacement paragraph:

Microprocessor 238, in addition to its operating system functions, preferably enables execution of software applications on mobile station 202. A predetermined set of applications which control basic device operations, including at least data and voice communication applications, will normally be installed on mobile station 202 during its manufacture. A preferred application that may be loaded onto mobile station 202 may be a personal information manager (PIM) application having the ability to organize and manage data items relating to user such as, but not limited to, e-mail, calendar events, voice mails, appointments, and task items. Naturally, one or more memory stores are available on mobile station 202 and SIM 256 262 (denoted as "mem" for "memory" in FIG. 2) to facilitate storage of PIM data items and other information.
